

Monofilament or coated braid hooklength, Of all the materials available, coated braid is the least damaging and less likely to tangle.

Anti-tangle tubing at least 4"-6" longer than hook length. This prevents tangles and more importantly prevents damage to the fishes flanks during playing.

Monofilament Nylon Mainline (12-15lb breaking strain preferred).

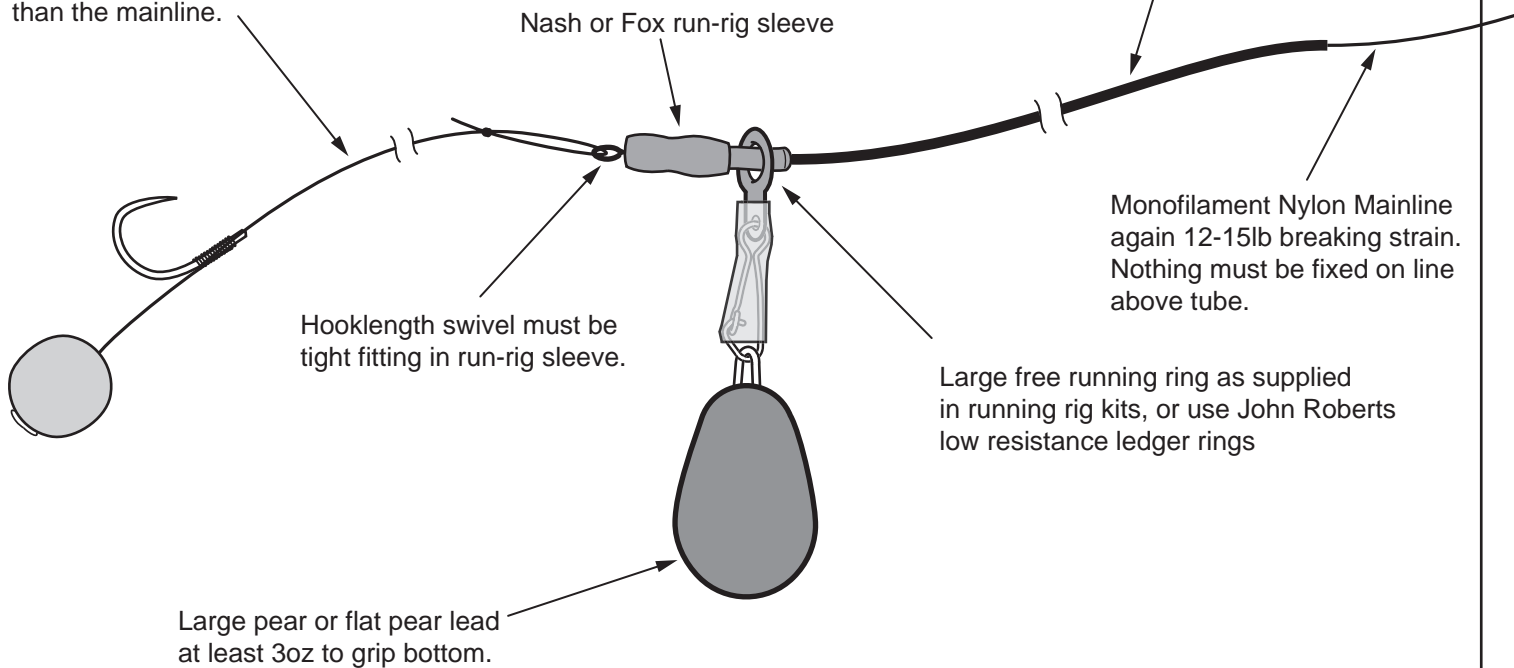

CARP RIG WITH SEMI-FIXED LEAD ARRANGEMENT

Mono or coated braid hooklength ideally this should be a lower breaking strain than the mainline.

Anti-tangle tubing at least 4"-6" longer than hook length.

Nash or Fox run-rig sleeve

Monofilament Nylon Mainline again 12-15lb breaking strain. Nothing must be fixed on line above tube.

CARP RIG WITH SEMI-FIXED LEAD ARRANGEMENT
